# Acknowledgments

The first person I would like to acknowledge is Yasmeen Westwood, for the opportunity to pen words to her inspirational art. In October 2019 I answered Spirit's call, traveled across the pond, and met my soul sister . . . and the rest is history.

A special thank you to my friend Betty Jane Ware, who was instrumental for making my trip to the UK happen.

I also want to acknowledge my King of Swords, who always believed that I could, so I did.

A special shout out to my sister Eva, who has been my personal cheerleader. It is her special kind of magick that has shown me that anything is possible.

Very grateful to Spirit for always guiding me, as I follow my soul's path, allowing me the pleasure to do what I love everyday.

# Welcome

Welcome to the wonderful world of the *Lenormand of Enchantment*; this is not your grandmother's deck!

We have taken the Lenormand world by storm and revolutionized the way the Lenormand system is read. Our goal is to bring the Lenormand back out of the dark ages into modern day with a fresh new look, with updated and relevant meanings. The goal of this deck is to be in league with and rival some of the best, preferred divination systems in use today. The *Lenormand of Enchantment* will do just that, bringing the Lenormand back in style! Our vision is that this deck will appeal to the masses and be in every professional's arsenal, with updated artwork, modern meanings, and combinations that are applicable to today's day and age, yet managing to hold on to a semblance of antiquity. The traditionalist won't be lost, and those new to the Lenormand system will be thrilled with the level of accuracy and inspired at the ease of interpretation. As a special mention, this guidebook was created during the time of the COVID-19 pandemic, and some of the writings were slightly influenced by that energy. This was done intentionally to immortalize history, like a mini time capsule of the dark times that united the world. My hope for this tiny spark of a deck is that it will find its way around the globe and bring a little bit of light to chase away the darkness.

All my love,
Kalliope

# Introduction

## What Is the Lenormand?

The Lenormand is a 36-card complete system of divination.
Being a very old system of divination, there is much dispute about dates and its historical origins. This guidebook is not the place to get into historical debates, for I chose to see the beauty that lies in the simple symbols within this system of cards, and how each of the cards speaks to each other and relates to one another. The Lenormand cards are read in pairs and strings, and their interpretation relies heavily on combined meanings of two cards to form one thought or sentence. Most of the cards have a distinct positive or negative connotation, while a few cards can be viewed as neutral.

# The Lenormand

## Misconceptions of the Lenormand

There are many people who feel that the Lenormand is an old, outdated system that has no relevance to today's modern world. With its outdated meanings and confusing "rules," it does not have the ability to answer questions or provide any sort of insight, and it is vague and hard to learn . . . and this my friends, cannot be further from the truth!

**1. You need intuition to read the cards.** The Lenormand is a "come as you are" deck; what you see is what you get, not shrouded in esoteric mystery. Intuition is not required but is most certainly welcomed.

**2. The system is difficult to learn; with so many combinations and meanings it will impossible to memorize them all!** The Lenormand is not about memorization; it is about understanding the keywords and knowledge of the cards' symbols.

**3. The system is confusing; there are so many different styles of reading the cards.** When first starting out, pick a system that makes sense to you, and stick with it.

**4. The Lenormand and Tarot share some of the same symbols, and that makes them the same.** Lenormand cards have no connection to Tarot cards and are not read in the same way, even if some cards share the same name. They are two completely separate divination systems. The biggest difference is that Lenormand is verbal while Tarot is visual.

**5. I don't like the Lenormand because some of the cards are so negative and look scary!** The Lenormand has positive, negative, and some neutral cards; that is just the way the Lenormand rolls, with the ups and downs of life.

Schiffer Publishing

These are just a few of the misconceptions that people have with the Lenormand. As you learn the language of the deck, you will be able to dispel many myths of your own.

## Choosing Your Lenormand Deck

With so many decks and styles available today, make sure that you choose a deck with artwork that appeals to you. The colors and the imagery have to grab and hold your attention.

## Storing Your Cards

This is strictly up to the individual; some choose pretty silk cloths, and others keep their decks in the original box. There is not a right or wrong way to store your cards; just do what feels right to protect your treasure.

## Cleansing Your Cards

There are many ways to cleanse your cards if you feel called to do so; by far the easiest way is to put them in their numerological order.

## How Can Lenormand Help?

Lenormand can help you get in touch with the intuitive, magickal side of yourself, by expanding your awareness, offering insight into your life, and clarifying any situation.

## Discernment

When reading for others, you are responsible for what comes out of your mouth . . . PERIOD.

## Fun Things to Do with the Lenormand

Journaling is key to self-discovery, learning the system by applying new meanings and discovering exciting new combinations. Many writers use the cards to get through creative blocks and inspire new plot twists. If you love to paint or draw, you can always pull out a card and create a version of your own. The possibilities are truly endless.

## A Few Key Points and Practical Tips When Learning the Lenormand

- The Man and Woman cards are the significators and always represent the Seeker.
- The cards are read in pairs and strings. Each card is a word, and when you string a couple of cards together, they form a sentence.
- The meanings are not esoteric in nature; they are for everybody.
- There are no reversals in the Lenormand; all cards are read in the upright position.
- Playing card associations, known as "the pips," can "up" your Lenormand game. Just look to the upper left corner to see which pip corresponds to each card.
- There are positive, negative, and neutral cards attached to each card's meaning.
- Each Lenormand card is equally important and carries the same weight.
- Lenormand cards have timing attached to each card, some more poignant than others, by using numerology or the generally accepted timing of that card.

Schiffer Publishing

- Cards are always read within the context of the question, and common sense is key when interpreting the Lenormand cards.
- The cards are metaphoric and can be read literally. Sometimes they present themselves as a humorous play on words and more often speak bluntly with a kind of "in your face" attitude.
- Order matters! What comes before and after? It is this nuance that makes all the difference in the interpretation of the cards.
- Spreads are not common with the Lenormand system. We leave that up to Tarot, where spreads are created with specific predetermined questions such as "What do I need to know about this situation?" or "Who or what will hinder me as I strive to achieve my goal?" These are just some examples; again, it's up to you to play and explore with your cards. Even though it's not common to use spreads doesn't mean that you cannot; we threw the rule book out the window with *The Lenormand of Enchantment*.
- The Lenormand is a great system when you need a clear answer to a question.

# Beginning a Reading

### STEP 1: Set the mood

Sometimes it's just as simple as taking three deep breaths to raise your vibration and go for it.

Schiffer Publishing

### STEP 2: Shuffle your cards

Mix up the energy of the cards and shuffle until it feels right.

### STEP 3: Ask your question

State your question either out loud or within. It doesn't matter, just as long as you are clear on what you are asking.

### STEP 4: Selecting your cards and laying the cards

When you are ready, lay out your cards; pull as many or as few as you like, as long as you pull more than one card.

### STEP 5: Interpreting the cards

First take a moment to observe which cards came out, and turn to the page in your guidebook for that card.

### STEP 6: Closing

Take a moment to thank your cards for the wisdom imparted, take a couple of grounding breaths, and put the cards away.

*The Lenormand of Enchantment* is written and illustrated in a way that will keep giving you gems of wisdom and impart secrets along the way, but only when you are ready to receive the messages.

# Card Descriptions and Combinations

Let me introduce you to the language of the Lenormand. I channeled each card's energy into a little poem to be used as a mnemonic, so you can get to know each other a little better. I have included an extensive list of two-card combinations to help you get started on this enthralling journey.

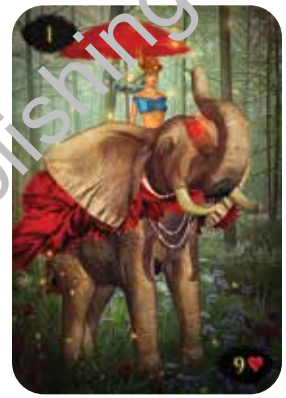

Schiffer Publishing

When the enchantment of this deck swirls and weaves its words around you, you too will discover new and exciting combinations and meanings to add to your repertoire.

PLEASE NOTE: Next you will meet the Man and Woman cards. These two belong to a very old system from days of yore, before the days of freedom to express yourself in the way you choose, and live how you want to live, and love whom you want to love. Feel free to adapt these cards in the way of your choosing and assign any meaning you choose. Even if you choose to be a unicorn!

# About the Author

Named after the Muse of Epic Poetry, Kalliope was taught from a very young age to read cards from her grandmothers. This began her love of cartomancy and led her to reading cards professionally for more than 30 years. In her former life, she held careers in both hospitality and financial management until 2015, when she answered Spirits' call to share her innate intuitive gifts with the world. Kalliope is currently touring North America and is featured as an international psychic medium and cartomancer. When not on the road, living the gypsy life, you can find her at home in her pyjamas curled up on the couch with a pen in hand and writing. She lives with her Mr. and two teen boys in their lakeside home in Ontario, Canada.
